

ONE SEASON, FULL RETURN

EVEN A 500-ACRE FARM CAN ACHIEVE PAYBACK WITHIN ONE GROWING SEASON.

SINGLE CROP EXAMPLE ▲▲

500 acres corn/soy/wheat :Inputs (seed, chemical, fertilizer): ~\$300/acre

1. 5% overlap reduction: $\sim 300\$/\text{acre} \times 5\% = \$15/\text{acre} \times 500 \text{ saved} = \$7,500/\text{year}$
2. Fuel savings: $\sim \$5/\text{acre} \times 500 = \$2,500/\text{year}$
3. Irrigation & spraying savings: $\sim \$2.5/\text{acre} \times 500 = \$1,250/\text{year}$
4. Labor & yield benefits: $\sim \$5/\text{acre} \times 500 = \$2,500/\text{year}$

TOTAL SAVINGS: \approx \$13,750/YEAR
